SOME OF THE GOALS OF THIS COURSE ARE TO:

- Develop a foundation for systematic identification of plants and the related cultural requirements.
- Develop an awareness of different design styles such as cottage gardens, land rehabilitation and home gardens - mainly through the study of the history of gardens.
- Gain the skill required to draw plans and to consider the relationship between design and construction.
- Learn to design water features, determine earthworks required and appropriate surfacing for different gardens.
- Develop an appreciation for the impact that design can have on the cost of a garden
